

Conservation tips for residents and staff

These simple tips can make your home or office more sustainable and environmentally-friendly.

- **Turn off faucets.** To help reduce water use, please turn off faucets when you're not using them. If you see a leak from the tap, the toilet or anywhere else, please call the Client Care Centre at 416-981-5500.
- **Turn off the lights.** It sounds easy, but it can be surprising how many of us leave the lights on even after we have left the room. Get in the habit of turning off the light every time.
- **Use the thermostat.** Try raising the temperature in your unit in the summer, and lowering it in the winter by just 1°C, and see how much energy you save. You might be surprised.
- **Unplug.** Many electronics and appliances, such as TVs, gaming consoles, computers and printers, continue to use electricity when they are switched off. Consider unplugging these devices when you're not using them, or purchasing a power bar that automatically turns off the power for you.
- **Dispose of waste properly.** In your unit, keep your recyclables and organics separate from your other garbage, and then dispose of each waste type separately.
