

# Enhancing fire safety

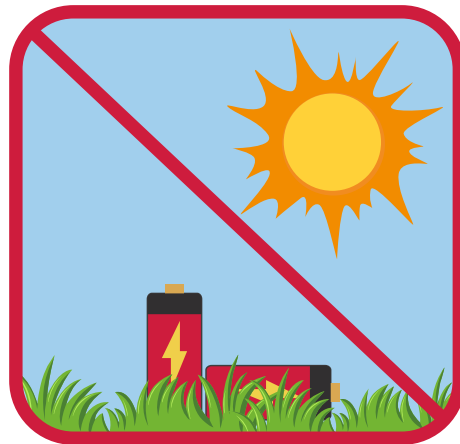

Fire safety is everyone's responsibility

## Battery safety

When not properly stored or charged, batteries can become a fire hazard. Follow these tips to be safe with your batteries.

### The cooler, the better

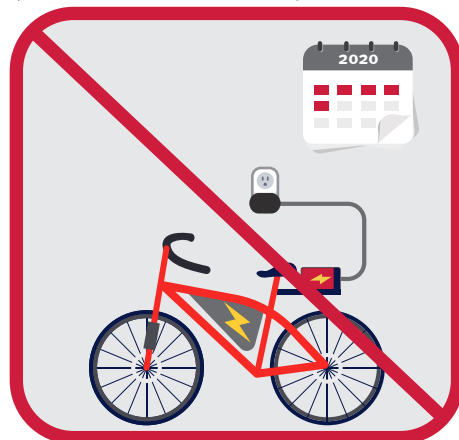

Never expose a battery to heat or direct sunlight.

### Dispose of them the right way

Don't keep expired or non-working batteries in your home. Call 3-1-1 to find out how to properly dispose of old batteries.

### Don't forget to pull the plug

Always unplug a charger once the battery has recharged. Leaving a charger plugged in longer than required reduces battery life and increases the risk of fire.
