

PETITION LETTER

Re: Third Party Security Reduction of Service

Third-party access control security is of paramount importance for a busy and potentially dangerous social housing building in the downtown core, Toronto.

In such a dynamic and high-traffic environment, where the safety and well-being of residents are at stake, robust access control systems provided by trusted third-party companies play a critical role. These systems help ensure that only authorized individuals gain entry, reducing the risk of unauthorized persons causing harm or engaging in criminal activities within the premises.

Moreover, third-party access control security enhances accountability, aids in monitoring and responding to incidents promptly, and ultimately creates a safer and more secure environment for the residents and the community at large. It is an essential investment to safeguard the residents' peace of mind, safety, and the overall integrity of the Toronto Community Housing [redacted] Street Location

Members of the Community Building Committee believe in safety, integrity, and the value of investing in the residents of [redacted] St. Community.
