

Vendor Award: Preventive Maintenance/Demand Services for Fire/Alarm Suppression Systems and Fire Hydrant Testing, Inspection and Maintenance Services (Group 5 – Seniors West)

Item 6C

March 18, 2024

Building Investment, Finance and Audit Committee

Report: BIFAC:2024-27

To: Building Investment, Finance and Audit Committee
("BIFAC")

From: Vice President, Facilities Management

Date: February 9, 2024

PURPOSE:

The purpose of this report is to seek the BIFAC's approval to award work to Oak Ridge Building Solutions Inc. for up to \$7,355,383.30 (exclusive of taxes) for fire/alarm suppression systems and fire hydrant testing, inspection, and maintenance services in the Toronto Seniors Housing Corporation ("TSHC") North West and South West Regions (Group 5 Operating Units O and Q) for a four year and nine-month term.

BIFAC approval is required for this contractor award as it exceeds the \$5 million financial approval limit of TCHC's Procurement Award Committee ("PAC").

RECOMMENDATIONS:

It is recommended that the BIFAC:

1. approve the award of work to Oak Ridge Building Solutions Inc. for up to \$7,355,383.30 (exclusive of taxes) for fire/alarm suppression systems and fire hydrant testing, inspection, and maintenance services in the TSHC Seniors North West and South West Regions (Group 5,

Operating Units O and Q) at the rates established for a four year and nine-month term based on the outcome of Request for Proposal ("RFP") 23059 as follows:

- \$1,245,045.34 (exclusive of taxes) for preventive maintenance as follows:
 - \$693,153.07 for two years and nine months of the initial contract
 - including Hydrostatic Testing in year two for \$27,300.00; and
 - including Sprinkler Obstruction Testing in year three for \$27,300.00;
 - \$551,871.27 for two additional one-year terms at TCHC management's discretion, including Hydrostatic Testing in year five for \$27,600.00;
- Up to \$6,110,358.96 (exclusive of taxes) for demand repairs not in scope as follows:
 - \$3,510,358.96 for two years and nine months of the initial contract; and
 - \$2,600,000.00 for two additional optional one-year terms at TCHC management's discretion;

Note: the award value has been prorated to include the awarded value of up to \$500,000.00 awarded as part of Direct Award 23568 for January 1, 2024, to March 31, 2024

2. authorize the appropriate staff to take all other necessary actions to give effect to the above recommendations.

PROJECT BACKGROUND:

TCHC is required to perform preventive maintenance (specific inspections and tests) on fire alarm and suppressions systems as per the Ontario Fire Code. Annual and bi-annual inspections and tests are performed by both site staff and contracted services. Monthly inspections and tests will be performed by site staff.

On an annual basis, contracted services are required by code to inspect and test the following:

- Fire alarm, voice communication and interconnected systems;

- Suppression and sprinkler systems, including fire hose cabinet, hoses and valve, hydrostatic testing (three years), and internal obstruction testing;
- Portable fire extinguishers;
- Fire pumps including jockey pumps and air compressors;
- Emergency generators;
- Audible pull stations;
- Smoke control systems;
- Integration testing of all systems, with the addition of HVAC, maglocks, smoke controls, elevator systems' integration with the fire alarm/suppression systems;
- Emergency lighting and fire exits signage; and
- Monthly test and inspections while performing the annual test and inspection.

On a semi-annual basis, contracted services are required by code to inspect and test the following:

- Mechanical water flow alarm main supply and pressure switches, low pressure alarms, and alarm signals at the fire alarm panel;
- Drip drums;
- Valves, system risers, and pressure; and
- Monthly test and inspections while performing the semi-annual test and inspection.

Contracted services are also required to perform demand repairs, which are repairs on an as-needed basis when there is equipment failure and/or based on the results of inspections.

REASONS FOR RECOMMENDATIONS:

This work is required to maintain fire safety and fire suppression systems, and ensure all codes are met to ensure the health and safety of our tenants.

The existing contract commenced on January 1, 2024, and ends March 31, 2024. The new contract for this program will be for two years and nine months, from April 1, 2024 to December 31, 2026, with two optional one-year extensions at TCHC management's discretion.

Work will not commence until this award has been approved, a Main Services Agreement – Life Safety Systems has been executed, and the

purchase order issued. Any significant delays in issuing the purchase order may impact the program schedule.

PROCUREMENT PROCESS:

An RFP was issued on March 9, 2023, and closed on April 26, 2023. Three submissions were received. The submissions were evaluated through a three-stage process to determine the lowest overall priced submission (including preventive maintenance and demand repairs).

TCHC and TSHC's portfolio were divided into five separate groups for fire/alarm suppression systems and one group for fire hydrant testing, inspection and maintenance services. Proponents were to be awarded a maximum of two groups for fire/alarm suppression systems based on their final score and by what is most financially advantageous for TCHC/TSHC.

Fire hydrant testing, inspection and maintenance services are to be awarded to the highest scoring proponent. At TCHC's direction, Eurotech Safety Inc. is only eligible to be awarded one group. Greater Toronto Fire Protection Services withdrew their bid during contract negotiations in December 2023, so the award strategy was adjusted to address the remaining two qualified bids.

The recommendation is to award the work for Group 5 buildings to Oak Ridge Building Solutions Inc. as the qualified submission.

See Confidential Attachment 1 for details on pricing and rated criteria.

IMPLICATIONS AND RISKS:

A public RFP was issued and the recommendation is based on awarding the contract as per the RFP requirements. Thus, the risk of a proponent challenging the awarding of the contract is minimized.

Upon approval of this award, Strategic Procurement will pursue execution of Main Services Agreement – Life Safety Services with the recommended proponent.

Entry into tenant units is required to conduct inspections and tests on specific fire alarm and suppression systems. Key holder services will be provided. Timely and appropriate notification will be provided to gain entry into the tenant units and to notify tenants of planned disruptions and restrictions.

Fire Life Safety staff will continuously and rigorously monitor the performance of the recommended proponent during the course of the program. Performance will be evaluated in accordance with TCHC’s Vendor Compliance Evaluation System. Results gathered through program reviews can be used to support decisions to remove underperforming vendors from TCHC’s rosters and/or future bidding opportunities.

Funding for this award is within the program budget of the 2024 Operating Budget (SLA.5291 and Operating Unit Budgets) and 2024 Capital Budget (CO04). Funding for future years budgets will be requested within the 2025 to 2028 Operating Budgets.
